

Mohamed Abdelnasser Eid

Frontend Developer

Cairo, Egypt — abonasser.work@gmail.com — +20 106 928 8988 — github.com/User-X5 —
linkedin.com/in/abonasser

Frontend Developer and third-year Computer Science student (Cumulative GPA: 3.3 / 4.0) specializing in React.js and modern web technologies. Builds responsive, scalable, and high-performance web applications using React.js, Next.js, Hooks, and Redux. Experienced in REST API integration (Axios / Fetch), performance optimization, cross-browser compatibility, and troubleshooting complex issues in production-ready environments.

WORK EXPERIENCE

Full Stack Web Development Intern

Aug 2023 – Sep 2023

National Telecommunication Institute (NTI) — Egypt

- Delivered a 160-hour Laravel internship, building 3 full-stack applications with 95% code-review approval
- Architected backend systems with 25+ routes and 10 controllers, reducing API response time by 30%
- Engineered 5 normalized database schemas with 15+ relationships, supporting 1,000+ daily transactions
- Integrated React frontends with Laravel APIs using Axios/Fetch, resolving performance issues and supporting 200+ concurrent users
- Applied Git workflows and participated in code reviews to maintain scalable and maintainable codebases

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

2023 – Present

Fayoum University

- Cumulative GPA: 3.3 / 4.0

TECHNICAL SKILLS

Frameworks	React.js, Next.js, Astro
React Ecosystem	React Hooks, React Router, Context API, Redux
Styling	Tailwind CSS, Bootstrap, CSS3, Animate.css, Responsive Design
UI & Effects	Animations, WebGL, Three.js
HTTP & APIs	Axios, REST APIs, Fetch API
Languages	JavaScript (ES6+), TypeScript, PHP, HTML5
Backend	Laravel
Databases	MySQL
Tools	Git, GitHub, VS Code, Webpack, Chrome DevTools
Quality	Testing, Performance Optimization, Cross-browser Compatibility
Currently Learning	Node.js, Express.js

SOFT SKILLS

- Problem Solving and Analytical Thinking
- Communication and Team Collaboration
- Time Management and Task Prioritization
- Adaptability and Continuous Learning
- Attention to Detail and Code Quality
- Leadership and Mentoring

PROJECTS

Anime Explorer App

React - Axios - REST API

- Built anime discovery platform serving 500+ daily users, reducing load time by 40% through caching and optimized API calls
- Engineered advanced filtering and search with responsive UI across multiple breakpoints
- Applied performance testing techniques and structured API communication using Axios, achieving 99.5% uptime

Weather Dashboard

React - Next.js - OpenWeather API

- Built a real-time weather application integrating OpenWeatherMap API
- Implemented responsive and accessible user interface design using Tailwind CSS
- Applied front-end development best practices to ensure performance and usability across devices

Custom Search Engine

React - Backend API

- Developed a search interface connected to a scraped backend API
- Implemented debounced search and pagination, resolving performance bottlenecks through troubleshooting
- Added unit testing using Mocha to validate API responses and improve application reliability

Animated Landing Pages

Astro - MDX

- Built interactive and responsive landing pages using Astro and MDX
- Designed engaging UI with animations while maintaining performance and SEO best practices

ACTIVITIES

Frontend Instructor — GDSC Fayoum University

Feb 2026 – Present

- Mentored 70+ students in React.js, guiding them to build real-world projects
- Conducted 12+ offline workshops and 15+ hands-on sessions, enabling 90% of participants to deploy their first React applications
- Delivered 8 online sessions reaching 500+ views, improving coding proficiency and practical skills
